

EXPLORATORIUM 2010

Name: _____

There are five major focus areas at the Exploratorium (plus the Tactile Dome). Each area is worthy of extensive investigation on its own and each contains fascinating exhibits about how the world around us and within us works.

During our day here you are to visit at least three of the five areas PLUS the Tactile Dome.

On the assignment sheet, write down the name of at least one exhibit from three different areas you visited and a brief description of what you learned from it OR why you found it interesting.

For extra credit... Take a picture of the exhibit explanation panel and a detail of the exhibit. It must be clear and either printed out or sent to mr milhous at cmilhous@slvusd.org

Don't be late for your Tactile Dome time!! Write down your entry time here _____

Note: Because our focus right now is on Rube Goldberg and Mousetrap Car projects, it will be helpful to spend some time in the World of Matter section to get some ideas for your projects... **take pictures for ideas!!** Don't forget to look for screw/worm gear uses and also look for motorized parts, electrical connections and things that make cool sounds!
